- f) To promote New Tourism Products and experiences in Nature-based tourism, gastronomy tourism, Wine tourism and Sports Tourism for individual or small group travellers.

Chapter (6)

Travel Agencies, Tour Guides and Tour Operators

1. Travel Agencies and Tour Operators

a. Pre-identification and Travel Plan

- 1) The travel agencies have a responsibility to make a travel plan available before the visitors' arrival.
- 2) The travel agencies should check previous travel history of the visit before bookings can be made.
- 3) The visitor should be informed if the travel plan does not comply with the requirements and guidelines set by the Minister of Health and Sport.
- 4) Hotels, accommodations and restaurants in travel plans have to check carefully according to the guidelines of the Ministry of Health and Sport.

b. Taking responsibility for travelling management

- 1) During the trip, travel agencies and travel planners must check the guests and traveller's temperature and signs/symptoms of respiratory disease such as sneezing, coughing (or) shortness of breath.
- 2) If it is possible, all the gathered information of visitors need to be recorded in the declaration form.
- 3) If the visitor's body temperature is above 38 C (or) has symptoms of respiratory disease, an immediate medical treatment should be instructed, and the travel agencies and travel planners must inform to the Ministry of Health and Sport.

c. Handling the Covid-19 suspected patient is reported

The following working process plan must develop in order to manage and identify a suspect COVID-19 from the visitors, employees and suppliers.

- 1) Information and facts of the quarantine centres and quarantine areas for those people who have a fever (or) the suspected patients.
- 2) Setting the specific ways for sending the patients to the quarantine areas.
- 3) Making arrangement for sending the patients to the designated hospitals.

2. Tour Guides/ Interpreters

a. Taking responsibility to manage the places in travel plan and the places the visitors are interested in.

- i. Using safety equipment – all the staffs and visitors must wear surgical masks and gloves.
- ii. Regularly check-up the visitors for the symptoms of respiratory disease such as fever, sneezing, coughing (or) shortness of breath.
- iii. Visitors' health information should be recorded in a declaration form.
- iv. If the visitor's body temperature is above 38 C (or) has symptoms of respiratory disease, and immediate medical treatment should be instructed. The travel agencies and travel planners must inform to the Ministry of Health and Sport.
- v. Ensure that the visitors are following the guidelines in the places in the travel plan and the places the visitors are interested in.

b. Implementing an appropriate and safe social distancing measures for the visitors

The tour guides and interpreter to describe the required preventative measures for safe social distancing:

- i. Queue Management – Limit the number of visitors at a pick-up point/ meeting point or (or) at the places out of travel plan and offer a quick service not to be delaying in queueing. (For example: To manage not to be crowded in a reception counter, information and ticketing counter and public restroom and to use floor marker for setting queuing areas to make sure at least 1-meter distancing in queuing.
- ii. Seating Management – To make sure the visitors' seats are spaced at least a metre apart. Individual or Family seating is allowed but must have kept a safe distance with other visitors.
- iii. Communication – Ensure for physical distancing.

Chapter (7)

Guiding Principles for Prevention for Hotel and Tourism Training Centres

1. Handwashing

- a) To provide the automatic handwashing facilities (which must not be required to use hands) and hand sanitizers sufficiently at the exit and entry doors.
- b) To wash the hands with soap for 20 seconds (or) to use alcohol-based hand sanitizers with greater than 60% alcohol after visiting the restroom and having a contact with the excretion from the human body and unclean materials (such as gloves, clothes, facial masks, used tissue and rubbish) and before touching the eyes, nose and mouth.

2. Preventative Measures for Coughing and Sneezing

- a) To encourage to obey all preventative measures for coughing and sneezing.
- b) To provide trash bin with lid for throwing away used tissue for those who are coughing and sneezing.
- c) To use the surgical mask and to use face shields when necessary following the guidelines set by the Ministry of Health and Sports.
- d) Arrange to seek medical care at the nearest place as possible and must instruct them to wear surgical masks if someone feels unwell in the classroom.
- e) Wearing a face mask improperly put you at greater risk so that one must use the mask properly and dispose of appropriately.

3. The distance between one and another

- a) Keep the desk in the distance at 6 feet apart for social distancing and try to avoid face to face sitting as much as possible.
- b) If it is possible, the classroom timetables should be scheduled separately to avoid the crowd at the entrances and exits, the lifts and the stairways.
- c) Arrange the seating to avoid the crowd at the canteen.

4. Regular Cleaning and Disinfection

- a) The most common touching areas in classrooms and school building (doors/ windows handles, switches, restrooms and flesh buttons, computer keyboards and teaching aids) must be cleaned and disinfected frequently. The floor must be disinfected once in a day. To do disinfection, Chlorine-based Sanitizers (0.1% Sodium Hypochlorite Solution (or) 0.1% Calcium Hypochlorite Solution and 70% Ethyl Alcohol can be used following the instructions published by Ministry of Health and Sports' website (<https://www.mohs.gov.mm/>) (or) Facebook page (www.facebook.com/MinistryOfHealthAndSportMyanmar).
- b) Must provide foot-operated waste bins for daily use.
- c) Arrange sufficient dustbins and regular garbage collection to avoid the crowded restrooms with long waiting time, and ensure to set up a sewerage and sanitation system.
- d) Ensure to have a proper ventilation environment in place inside classrooms by the opening of windows, depending on the weather condition,
- e) There is no scientifically proof of Spraying pesticides inside and outside of buildings and spraying of individuals with disinfectants (using a small room and vacuum chamber) is not recommended and the practice could physically harmful to eyes, respiratory tract and skin.

5. Risk Awareness Campaign

The posters, videos and news in electronic form must use to do COVID-19 risk awareness campaign, in which using only an official announcement and information from Ministry of Health and Sports and World Health Organization to tackle rumours and fake news.

6. Managing the Covid-19 suspected trainees

- (a) If a trainee has any sign of the following factors, let him/her stay at home in isolation and inform to the department for proper treatment.
 - i. Fever (38 C/ 100.4 F and above temperature), coughing, difficulty breathing or shortness of breath and fatigue.

- ii. Contact with Covid-19 positive confirmed patient in the previous 14 days.
 - iii. Staying together at home with Covid-19 suspected patients and with those who are in quarantine.
- (b) Must inform the nearest hospital or clinic at once and put his/him in isolation if any trainee feels unwell with suspected symptoms during the class time. Ministry of Health and Sports will continue to take any necessary action and giving health care.

Chapter (8)**Directive of the National Central Committee for****COVID-19 Prevention and Control**

Directive of the National Central Committee for COVID-19 Prevention and Control's instruction No.1334/264 / COVID-19 / Committee (2020) dated 14-7-2020 instruct the performing guidelines for the religious ceremonies as follow;

- a) To send the detailed plan for the ceremony three weeks in advance to the Ministry of Religion and Culture.
- b) The Ministry of Religion and Culture must obtain permission from the National Central Committee for Prevention and Control of COVID-19.
- c) The Ministry of Health and Sports must re-submit (whether the ceremony should allow/not and if the ceremony assumes to allow, the participants should not be more than 30 participants and must follow the guide dance set by the Ministry of Health and Sports) the request of Recommendation from National Central Committee for Prevention and Control of COVID-19.

Chapter (9)
